

Compare Canada's Vaccine Schedules

Birth to 18 Years Provincial/Territorial Averages

1950s

14 doses of
5 vaccines

1983

23 doses of
7 vaccines

2020

68 or **70** doses of
16 or 17 vaccines

SUB-STANDARD VACCINE SAFETY TESTING

No childhood vaccine product licensed for use in Canada or the USA has been tested using the long-term, double-blind, placebo-controlled studies required for all other pharmaceutical products. The medical industry uses the monitoring of adverse events following vaccination as the primary method to evaluate safety.

Our children are injected with products where safety is determined by the amount of injury or death reported after vaccination.

By design, vaccines force the immune system to respond with inflammation which then triggers the brain's own immune cells (microglia) to secrete highly toxic chemicals that lead to a chronically inflamed state in the brain, destruction of connective synapses, seizures, and brain injury.

Are Canadians under a spell?

DO YOU BELIEVE THE VACCINE LIE?

No Liability for Vaccine Injury/Death

Vaccines are the only product where a manufacturer is not legally liable for the injuries and deaths caused by their products. The ultimate result of this legal immunity is that no one is held responsible for the injuries and deaths caused by vaccination.

Do Vaccines Make Children Healthier?

For the first time in history... children are sicker than the generation before them. They're not just a little worse off, they are precipitously worse off physically, emotionally, educationally and developmentally."

~ Judy Converse, Pediatric Nutritionist, MPH, RD, LD

Would You Knowingly Harm a Child?

When will we finally conclude that these state imposed medical interventions do not work and that they in fact harm children? These groundbreaking studies shows that unvaccinated children are healthier than vaccinated children - bit.ly/HealthyKidsVCC
