# Robert W Malone MD

As the original “inventor” of mRNA and DNA vaccines...  
I am concerned about how the technology is being  
developed and implemented.

It was the best of times, it was the worst of times, it was the age of wisdom, it was the age of foolishness, it was the epoch of belief, it was the epoch of incredulity, it was the season of light, it was the season of darkness, it was the spring of hope, it was the winter of despair, we had everything before us, we had nothing before us...

- *A Tale of Two Cities*

I am an internationally recognized scientist/physician and the original inventor of mRNA vaccination as a technology, DNA vaccination, and multiple non-viral DNA and RNA/mRNA platform delivery technologies. I hold numerous fundamental domestic and foreign patents in the fields of gene delivery, delivery formulations, and vaccines: including for fundamental DNA and RNA/mRNA vaccine technologies.

I have approximately 100 scientific publications with over 12,000 citations of my work (per Google Scholar with an “outstanding” impact factor rating). I have been an invited speaker at over 50 conferences, have chaired numerous conferences and I have sat on or served as chairperson on HHS and DoD committees. I currently sit as a non-voting member on the NIH ACTIV committee, which is tasked with managing clinical research for a variety of drug and antibody treatments for COVID-19.

I received my medical degree from the Northwestern Feinberg School of Medicine. I completed the Harvard Medical School fellowship as a global clinical research scholar in 2016 and was scientifically trained at the University of California at Davis, the University of California at San Diego, and at the Salk Institute Molecular Biology and Virology laboratories. I have served as an assistant and associate professor of pathology and surgery at the University of California at Davis, the University of Maryland, and the Armed Forces University of the Health Sciences. For many years, my wife and I have built and run a consultancy and analytics firm specializing in biotechnology and clinical trials development.

My partner in all of this is Jill Glasspool Malone, PhD. She likes to stay behind the scenes, but you can be assured that in

almost all of my professional endeavors, she has been and will be involved. She also is well published and has an extensive CV. We have been together since high school (over 45 years) and have been married for 42 of those. We live on a horse farm in Virginia, which has become our own personal “Galt’s Gulch”. An idea that we embrace and build upon. Having an intentional community is one of the tenets of how we live.

So, what has brought me to the point of daily podcasts, interviews, op-eds, advocacy with legislators and building a twitter feed of almost a half million people? It started with my own experiences and concerns regarding the safety and bioethics of how the COVID-19 genetic vaccines were developed and forced upon the world, and then then expanded as I discovered the many short-cuts, database issues, obfuscation and frankly, lies told in the development of the Spike protein-based genetic vaccines for SARS-CoV-2. Personal experiences involving identifying, developing, and trying to publish peer-reviewed academic papers focused on drug repurposing and the rights of physicians to practice medicine as well as what I have seen close colleagues go through have further influenced me. Finally, as unethical mandates for administering experimental vaccines to adults and children began to be pushed by governments, my research into what I believe is authoritarian control by governments that are being manipulated by large corporations (big finance, big pharmaceutical, big media and big technology) influenced my changing world view.

Now, I have always been taught and believed that vaccines must be developed in conjunction with life saving treatments for an emerging infectious disease or a pandemic. I am a vaccinologist. I invented the core mRNA vaccine technology platform. I have spent much of my career working on vaccine development. I have also had extensive experience in drug repurposing for infectious disease outbreaks. I am not an antivaxer in any way, shape or form. But I do believe that the short cuts that the USG have taken in bringing the mRNA and the adenovirus vaccines to market for this pandemic have been detrimental and contrary to globally accepted standards for developing and regulating safe and effective licensed products.

I have now done hundreds of podcasts and interviews. I am a regular guest on many shows and have written many editorials that have been published in mainstream newspapers. Along with many other physicians and scientists advocating early treatment, I have toured globally to help educate physicians and the public about early treatment options while also opposing the unethical mandates.

I used to believe that the FDA, NIH, and CDC were working for the people, not big pharma. I thought that if we could just re-purpose already known, safe drugs for emerging infectious diseases, we could quickly find ways to reduce the death rate. I thought that drug and vaccine development were regulated by the Federal government for the common good. What I have learned over the last two years is that regulatory capture of the federal government has warped and shaped the work of Congress and Federal agencies to such an extent that they no longer represent what is in the best interests of the nation, the world, and humanity. The more I have expressed data-based concerns about what is happening with the vaccines, the US Federal and WHO responses, the more I have been censored, defamed, and subjected to various forms of character assassination by big tech and legacy media. I am not alone in being targeted. Mainstream media has attacked and censored me and other prominent physicians/scientists who do not recite the governmental narrative. This has been developed into a standard process and deployed worldwide as a technique for suppressing physician dissent – quite literally hunting physicians deemed guilty of thoughtcrimes (such as questioning vaccine safety and effectiveness) or of the “sin” of treating patients with lifesaving drugs in an outpatient setting.

What is happening is not right, it is not proper and it is not fair.

So, let get down to fixing it.

# My Mission

My mission is to ensure vaccine safety, make sure that children are protected, stop and/or limit the vaccine mandates, to identify and teach about lifesaving treatments for COVID-19 and other pandemics. My goal is to save lives.

## The Malone Doctrine

*A Declaration of Independence*

*From The Decisions of Institutions That Lack Integrity*

**We The Undersigned:**

- Demand that all underlying data that contributes to a body of work under consideration must be made available and must remain accessible for analysis.
- Proclaim the value of knowledge to society is not determined by any given creator of information. Instead, that it is the beneficiaries of knowledge who assign value to a proposition only through thorough critique and relentless scrutiny.
- Establish the free and open exchange of information and establish as a duty the authority to serve as the custodians of all data forming the basis of our decisions.
- Require the full disclosure of all sources of funding regarding any citation noted or references made pertaining to any matter under consideration.
- Commit to impartiality in consideration of all analytical information and data brought before us and expect the same from all others.
- Foster rigorous open debate and scrutiny in consideration of and for any matter of concern.
- Shall promptly make the discovery of intellectual dishonesty or professional irresponsibility known to all.
- Ensure the health, welfare and safety of any whistleblower, bringing forth and/or making public an abrogation of the beliefs held herein.
- Stand in opposition to censorship and will not accept representations of parties holding within themselves values that conflict with principles of free expression.
- Deny no person the right to challenge, debate, petition, redress, examine or protest with facts and evidence any decision of this body.
